Input Power

120–240 V, 1-Phase Power

Amperage Range 120 VAC: 5–150 A (DC TIG)
20–100 A (DC Stick)
240 VAC: 5–150 A (DC TIG)
20–150 A (DC Stick)

Max. Open-Circuit Voltage 90

Net Weight 13.7 lb. (6.2 kg)

Allows for any input voltage hookup (120–240 V) with no manual linking, providing convenience in any job setting. Ideal solution for dirty or unreliable power.

Multi-Voltage Plug (MVP™) allows for connection to 120- or 240-volt receptacles without tools by choosing the plug that fits the receptacle and connecting it to the power cord.

Portable in the shop or at the job site—at 13.7 pounds, the shoulder strap allows the end user to easily move from location to location.

Lift-Arc™ provides TIG arc initiation without the use of high frequency.

Full function remote control for precise amperage control for critical welds on thin materials (6-pin fingertip or foot control available.)

Thermal overload protection with indicator light helps prevent machine damage if the duty cycle is exceeded or airflow is blocked.

Built-in gas solenoid eliminates the need for bulky torch with a gas valve.

TIG/Stick Package (#907 136 017) comes complete with:

- Maxstar 150 STH power source
- 10-ft. (3 m) MVP™ power cord
- MVP™ plugs 5-15P (120 V, 15 A) and 6-50P (240 V, 50 A)
- X-CASE™ provides protection in transport and storage
- Remote fingertip control
- Weldcraft™ A-150 (WP-17) 12.5-ft (3.8 m) TIG torch with connector
- Stick electrode holder with 13-ft. (4 m) cable and 25-mm Dinse-style connector
- Work clamp with 10-ft. (3 m) cable and 25-mm Dinse-style connector
- Flow gauge regulator with gas hose
- AK2C accessory kit
- Shoulder strap

Pulse. Pulsing can increase puddle agitation, arc stability and travel speeds while reducing heat input and distortion.

High frequency for non-contact arc initiation that reduces tungsten and material contamination.

Selectable trigger configuration allows the operator to choose standard or 2T trigger method to meet the application.

Single amperage range allows operator to accurately set amperage on both 120- or 240-volt primary power.

Inverter-based, DC power source has a **simple-to-use operator interface** providing only the necessary controls in a compact machine.

Hot Start™ adaptive control provides positive arc starts without sticking.

Best-in-class Stick arc characteristics for those demanding jobs.

Low OCV Stick is a simple design that reduces the open-circuit voltage to 12–16 volts when the welding power source is not in use. This circuit design is now built into the Maxstar 150 STH eliminating the need for add-on voltage reducers.

Power Factor Corrected (PFC) for optimum performance especially on 120 volts—reduces nuisance breaker tripping.

Fan-On-Demand™ power source cooling system operates only when needed, reducing noise, energy use and the amount of contaminants pulled through the machine.

Power source is warranted for 3 years, parts and labor.
Original main power rectified parts are warranted for 5 years.
