

Cobot Welder

powered by beaçon

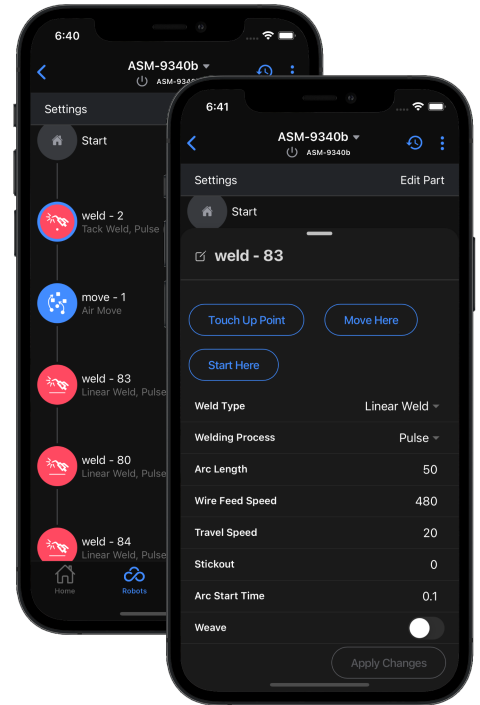

Demo Days January 11th & 12th, 2023.

**Growing your fabrication business
is nearly impossible if you can't
find skilled welders.**

**The Cobot Welder solves this
problem for you.**

Cobot Welder leverages app-based software that empowers *all* of your welders to take advantage of robotic welding.

Unlike other systems that require robot programmers, the Cobot Welder can be easily used by your existing welders. Don't trade your lack-of-skilled-welders problem for a lack-of-skilled-robot-programmers problem. The Cobot Welder, Powered by Beacon™, empowers everyone on your team!

COBOT DEMO DAYS, JANUARY 11th & 12th

What's Included

Programming Interface	Cobot Welder, Powered by Beacon®, pre-installed
Cobot	Universal Robots UR10e
Welder	Miller Invision MPa 352
Wire Feeder	Miller S74 MPa
Torch	Tregaskiss Toughgun G3
Welding Table	Siegmund 32" x 48" welding table
Operator Button Box	Play, Stop, Arc on/off, Emergency Stop, and Flex Button
Starter Kit	Contact tips, drive rolls, nozzles, teach tip

Specs

Maximum Cobot Reach	51.2in (1300mm)
Cobot Working Range	± 360° (all joints)

Requirements

Cobot Power Requirements	100 - 240VAC
Welder Power Requirements	Autoline (220v single phase - 575v three phase)
Internet	RJ45 hardline with outbound internet access
Physical Space	approx. 8 feet x 8 feet

Distributed By

Welders

2225 S.116th St.
West Allis WI 53227
