

Digital Infinity™ Series

Auto-Darkening Welding Helmets

Welding Safety and Health 

Quick Specs

Viewing Area
13.4 sq. in. (86.45 sq. cm)

Operating Modes
Weld, cut, grind and X-Mode™

Shades
Cut: 5–8
Weld: 8–13

Sensors 4

TIG Rating 5 amps and below

Switching Speed 1/20,000 sec.

Weight 23 oz. (652 g)

Optional helmet lighting accessory kit includes two lights (one for each side) and all required mounting hardware.

Largest viewing area in the industry. 13.4-square-inch viewing area with wide screen format provides unsurpassed view and eliminates tunnel vision.

ClearLight™ Lens Technology optimizes contrast and clarity in welding and light states. 1/1/1/2 optical clarity rating allows for a lighter light state while not welding — keeping the helmet down — maximizing safety and productivity.

Four arc sensors and four modes: weld, cut, grind and X-Mode. X-Mode electromagnetically senses the weld to eliminate sunlight interference and continuously detects the arc even if sensors are blocked.

Gen 3.5 headgear with comfort cushion has an ergonomic design that provides extensive adjustability, settings, and enhanced support.

Features InfoTrack™:

- Tracks and displays arc time
- Allows operator to set time, alarm, and timer
- Provides multi-language help menu

Digital controls easily allow welder to adjust shade, delay, and sensitivity.

AutoSense™ eliminates issues related to setting helmet sensitivity by allowing the welder to push and hold the AutoSense button to automatically set the helmet sensitivity for their environment.

Meets ANSI Z87.1+, CSA and CE standards.

Auto-darkening lens is warranted for three years.
