Passive Lens: Ideal if you weld with the same shade for long periods of

Auto-Darkening Lens: Ideal if you switch between shades frequently for different types of welding or welding in varied environments

Arc Sensors: An increased number of arc sensors makes the lens more sensitive and provides better lens response

Viewing Area: Larger viewing areas tend to be better for out of position or all-day use because they improve peripheral vision

ClearLight[™] **Lens Technology:** Ideal if you want to see the detail of your weld more clearly and with more natural colors

AutoSense™: Automatically sets your helmet sensitivity by sensing your welding environment

X-Mode™: Ideal if you frequently weld outdoors or out of position and want to ensure your lens darkens and lightens accurately

Cut & Grind Mode: Ideal if you frequently switch between welding, cutting or grinding

Grind Button: Easily transition from welding to grinding with the touch of a button

Grind Shield: Large clear viewing area ideal for frequent grinding and for keeping eyes protected in between welds

InfoTrack™ Data Monitoring: Makes it easy to track arc time and arc count for improving productivity and more accurately quoting projects

Memory Function: Eases switching between two preset customized memory settings

HDV Technology: Provides a sharp detailed view at any angle with minimal distortion

IMPROVED! T94™ Series For the professional welder.

All models now feature ClearLight™ 2.0 Lens Technology.
