KEY BENEFITS

These go a long way toward getting more done on a jobsite.

MULTIPROCESS

Easily switch from MIG to TIG to stick and back with the flexibility to take on any project that hits your bench.

FUTURE-PROOF

Product upgrades are as easy as downloading software updates to a USB stick and plugging it in.

WELD LONGER

Higher duty cycle, a 15-foot MIG gun and dinse connections mean fewer interruptions.

AUTO-SET™

Fast and easy predefined settings for multiple materials and processes to help you get welding quickly.

SPECIFICATIONS

Applications	Light Fabrication, Maintenance and Repair, Automotive		
Process	Flux Cored (FCAW), MIG (GMAW), Stick (SMAW), TIG DC (GTAW-DC)		
Weld Thickness	Mild Steel 24 ga. - 3/8 in. (MIG) Aluminum 18 ga. - 3/8 in. (MIG)	Mild Steel 24ga - 1/4 in. (TIG) Mild Steel 16 ga. - 3/8 in. (Stick)	
Input Output	120V/240V, single phase, 50/60 Hz		
Rated Output	MIG:	TIG:	Stick:
	120 V: 130A at 20.5 V, 25% duty cycle	120V: 140A at 15.6 V, 40% duty cycle	120V: 95A at 23.8V, 40% duty cycle
	240 V: 215A at24.8V, 30% duty cycle	240V: 190A at 17.6 V, 20% duty cycle	240V: 190A at 27.6 V, 20% duty cycle
Weight	38 lbs.
