Quick and easy setup

Includes a 15-foot (4.6 m) **MDX™-100 MIG gun** with front load liner that optimizes wire feedability.

Auto-Set™ fast and easy predefined settings for multiple materials and processes to help you get welding quickly.

- Wire/gas combinations include Flux Cored, Mild Steel with 100% CO₂, Mild Steel with C25, Stainless Steel, and Aluminum with spool gun
- Select the weld process and gas being used
- Select the wire diameter (.024, .030 or .035 in.)
- Select the material thickness you're welding
- Start welding with the exact parameters you need!

Smooth-Start™ provides a smooth, spatter-free start. It's the best-starting machine in the small MIG machine category.

Multi-voltage plug (MVP™)

allows connection to common 120- and 240-volt power receptacles without the use of any tools — simply choose the plug that fits the receptacle and connect to the power cord.

Angled cast-aluminum drive system with calibrated tension knob creates consistent feeding and easy setup.

Quick Select™ drive roll makes setup quicker by offering three grooves — two for different size solid wire and a third for flux-cored wire.

Continually upgradeable. USB-enabled software allows expandable machine capabilities without requiring mechanical modifications. This ensures the investment continues to produce over time, even as needs evolve.

Auto Spool Gun Detect™ automatically detects when a MIG gun or spool gun is connected, eliminating the need for a switch.

Fan-On-Demand™ cooling system only operates when needed, reducing noise, energy use and contaminants pulled through the machine.

Welder is warrantied for three years, parts and labor.
Gun warrantied for 90 days, parts only.

Uses 4- or 8-inch (102 or 203 mm) spools and can be set up to weld with .024–.035 in (0.6–0.9 mm) solid wire and .030–.045 in (0.8–1.2 mm) flux-cored wire.

Comes complete with:

- Power source
- 15 ft. (4.6 m) MDX™-100 MIG gun
- 15 ft. (4.6 m) work cable with clamp
- 6.5 ft. (2 m) power cord with MVP™ plugs for 120 V and 240 V
- Flow gauge regulator and gas hose for argon or AR/CO₂ mix
- Two contact tips for .030 in. (0.8 mm) wire
- Quick Select™ drive rolls for .024 in. (0.6 mm) or .030/.035 in. (0.8/0.9 mm) solid wire, and .030/.035 in. (0.8/0.9 mm) flux-cored wire
- Material thickness gauge ▶ 229895
- Hook-and-loop cord wraps

Note: Shielding gas and safety equipment not included.

Operation Modes

Auto-Set™ mode

Auto-Set eliminates guesswork and saves you time on setup. Begin by pressing the Auto-Set button. The Auto-Set back-lit light indicates the mode is activated.

1. Press process soft-key.
2. Rotate left or right knob to scroll and press knob to select operating condition.
3. Repeat for wire diameter and material thickness conditions.

Auto-Set predefined weld setting ranges are infinitely adjustable — predefined welding range is identified on screen between the green brackets and ideal welding parameters are identified on screen by the green dot and blue text. Auto-Set predefined weld settings are configured for: steel material with C25 gas mixture (75% argon, 25% CO₂) and C100 (100% CO₂); stainless steel material with C2 gas mixture (98% argon, 2% CO₂); aluminum material with argon gas when using a Spoolmate™ 100 or 150.

Manual mode

When welding outside of Auto-Set capabilities, or if you prefer custom parameters, use manual mode. The parameter chart on the inside of the access door is an easy-to-use guide for determining your voltage and wire feed speed settings. To access manual mode, ensure that Auto-Set is off. Simply rotate the left knob to adjust voltage and the right knob to adjust wire feed speed.
