CSA Approved Multi-Function Welder

115/230V Single Phase 195 Amp Welder Lightweight and Portable

Features:

The RAZORWELD MIG195 is a inverter-based portable MIG welding machine with added ARC & TIG function. The MIG function allows you to weld with both Gas Shielded and Gas-less wire applications. Easy step-less adjustment of voltage and wire feed make for easy setting of welding parameters giving excellent, professional welding results. Wire Inch gives easy feeding of the wire during set up without gas waste and the Burn Back adjustment leaves the wire out ready for the next weld. ARC welding capability delivers easy electrode welding with high quality results, including cast Iron, stainless and low hydrogen. An additional feature is the Spool Gun ready function that allows the simple connection of the SPGRWA200 Spoolgun for the use of thin or softer wires that don't have the column strength to feed through standard MIG torches, such as aluminum wire. This is an industrial machine that is both lightweight and portable. Being Dual Voltage single phase gives great versatility. Ideal for general engineers, Contractors, maintenance workshops and rural workshop, Designed and built to our specifications. A Robust and quality a real standout in the field. This is a big performance machine

Optional Spool Gun

CODE: KUMJRRW195

Standard Package includes: 195A MIG Machine, TWC2 10 ft MIG Torch, Earth Lead & Arc Lead 0.62" x 13ft, Argon Regulator, Power Adapter , Carry Bag is Optional

CODE: KUMJRRW195T

Standard package as above but with a WP17V-13ft T.I.G Torch option
